GDPR IN THE CANTEEN

It’s not rocket science

Discussing dietary needs?
Do you respect the privacy of staff and students’ data such as dietary needs. This is special category data and as such has tighter controls in how it is handled.

What about student/staff privacy?
Do you keep all student information out of sight of visitors and delivery drivers?

After service - paper records?
Do you screw up lists and notes and throw them in the bin? This is a serious data risk; consider securely cross-shredding all paper data.
